Dear Miss Frankfurter:

In accordance with your request I have read the piece on "World Currency Stabilization" prepared by Sylvia Porter. I believe it would be a mistake to release this material in its present form either to the British people or to our own. This manuscript contains a number of statements which are clearly inaccurate and others which although they are true in part, are misleading because they give undue weight and emphasis to non-essential details.

Very truly yours,

/s/ EMB
