

*Marked for changes*

*Preliminary Draft Outline  
Of a Proposal for*

**AN INTERNATIONAL STABILIZATION FUND  
OF THE  
UNITED AND ASSOCIATED NATIONS**

*Revised July 10, 1943*

**U.S. TREASURY**

**WASHINGTON, D. C.**

The plan for post-war international currency stability set forth in this pamphlet is a revision of the preliminary draft outline of a proposal for an International Stabilization Fund of the United and Associated Nations made public by the Secretary of the Treasury on April 7, 1943.

The preliminary draft was sent by the Secretary of the Treasury to the finance ministers of the United Nations and the countries associated with them with a request that it be studied by their technical experts. The finance ministers were also invited to send representatives to Washington for informal discussions with the experts of this Government.

Such informal discussions have been held with nearly 30 countries. On the basis of these discussions, the experts of the Treasury with the cooperation of experts of other Departments of this Government have revised the preliminary draft proposal for an international stabilization fund. While suggestions of the representatives of other countries have been included in the revised draft, it does not necessarily reflect the views of the experts of any other country.

This revised draft is in every sense still a preliminary document representing the views of the technical experts of the Treasury and of other Departments of this Government. It has not received the official approval either of the Treasury or this Government.

## FOREWORD

By HENRY MORGENTHAU, Jr., *Secretary of the Treasury*

When the United Nations have brought this war to a successful conclusion, they will be faced with many urgent international economic and financial problems. Some of these are new problems arising directly from this war; others are continuing consequences of failure to solve the problems that have been with us since the last war. The solution of these problems is essential to the development of a sound economic foundation for world peace and prosperity.

" All of the important international economic and financial problems are closely interrelated. Monetary stabilization, commercial policy, the provision of long-term international credit, promotion of stability in the prices of primary products, and arrangements for relief and rehabilitation are problems that join at innumerable points. Nevertheless, because of their complexity, they must be taken up separately, although each in turn must be integrated with the rest.

" It is generally recognized that monetary stability and protection against discriminatory currency practices are essential bases for the revival of international commerce and finance. For this reason, an appropriate starting point might well be the consideration of post-war international monetary problems. Success in dealing with international monetary problems in the post-war period will contribute toward final solution of the other international financial and economic problems. Despite the technical difficulties involved, the common interest which all countries have in the solution of post-war monetary problems provides a basis for agreement.

" It is still too soon to know the precise form and magnitude of post-war monetary problems. But it is certain that we shall be confronted with three inseparable monetary tasks: to prevent the disruption of foreign exchanges, to avoid the collapse of monetary systems, and to facilitate the restoration and balanced growth of international trade. Clearly, such formidable problems can be successfully handled only through international action."

The creation of instrumentalities adequate to deal with the inevitable post-war monetary problems should not be postponed until the end of hostilities. It would be ill-advised, if not dangerous, to leave ourselves unprepared at the end of the war for the difficult task of international monetary cooperation. Specific and practical proposals

must be formulated by the experts and must be carefully considered by the policy-shaping officials of the various countries. In each country acceptance of a definitive plan can follow only upon legislative or executive action. And even when a plan is finally adopted, much time will be consumed in preparation before an international institution for monetary cooperation can begin effective work.

There is another important reason for initiating now concrete discussions of specific proposals. A plan for international monetary cooperation can be a factor in winning the war. It has been suggested, and with much cogency, that the task of assuring the defeat of the Axis powers would be made easier if the victims of aggression could have greater assurance that a victory of the United Nations will not mean in the economic sphere a repetition of the exchange instability and monetary collapse that followed the last war. The people in all of the United Nations must be given some assurance that there will not again be two decades of post-war economic disruption. The people must know that we at last recognize the fundamental truth that the prosperity of each country is closely linked to the prosperity of other countries.

One of the appropriate agencies to deal with international economic and monetary problems would be an international stabilization fund with resources and powers adequate to the task of helping to achieve monetary stability and of facilitating the restoration and balanced growth of international trade. A proposal along these lines was drafted by American technical experts and made public on April 7, 1943. There have been informal discussions on this draft in which nearly thirty countries have participated. These discussions have shown that all countries think joint action in this field is necessary for the reconstruction of the world economy.

" It is recognized that an international stabilization fund is only one of the instrumentalities which may be needed in the field of international economic cooperation. Other agencies may be needed to provide long-term international credit for post-war reconstruction and development, to provide funds for rehabilitation and relief, and to promote stability in the prices of primary international commodities. There is a strong inclination on the part of some to entrust to a single agency the responsibility for dealing with these and other international economic problems. We believe, however, that an international economic institution can operate most effectively if it is not burdened with diverse duties of a specialized character.

" Although an international stabilization fund can provide the facilities for cooperation on monetary questions, the establishment of such an institution would not of itself assure the solution of these difficult problems. The operations of such a fund can be successful only if

the powers and resources of the fund are used wisely, and if member countries cooperate with the fund's endeavors to maintain international equilibrium at a high level of international trade. Such cooperation must include commercial policies designed to reduce trade barriers and to terminate discriminatory practices that have in the past hampered the balanced growth of international trade. The nations of this world can be prosperous only if they are good neighbors in their economic as well as their political relations. "

The draft proposals that have been put forward on a tentative basis have received wide publicity in the United States, the United Kingdom, Canada, and in other countries. It is in the best democratic tradition that the people should have the fullest opportunity to express their views and to shape the policies of their Governments on the important problems affecting national well-being. And it is an extension of this tradition that all the United Nations should have an opportunity to participate in the formulation of a program for international monetary cooperation.

This revised draft is published with the hope that it will call forth further comments and constructive suggestions. It aims to present only the essential elements of a workable international stabilization fund, and its provisions are in every sense tentative. Obviously, there are many details that have been omitted and that can be better formulated after there is agreement on the more important points. We believe that a workable and acceptable plan can emerge only from the joint efforts of the United Nations supported by enlightened public opinion.

PRELIMINARY DRAFT OUTLINE OF A PROPOSAL FOR  
AN INTERNATIONAL STABILIZATION FUND  
OF THE  
UNITED AND ASSOCIATED NATIONS

**Preamble**

1. There is a growing recognition that progress toward establishment of a functioning democratic world in the post-war period will depend on the ability of free peoples to work together in solving their economic problems. Not the least of these is the problem of how to prevent a widespread breakdown of currencies with resultant international economic disorder. We must assure a troubled world that the free countries will solve these perplexing problems, and that they will not resort to competitive exchange depreciation, multiple currency practices, discriminatory bilateral clearing, or other destructive foreign exchange devices.

2. These are not transitory problems of the immediate postwar period affecting only a few countries. The history of the past two decades shows that they are continuing problems of vital interest to all countries. There must be a general realization that world prosperity, like world peace, is indivisible. Nations must act together to restore multilateral international trade, and to provide orderly procedure for the maintenance of balanced economic growth. Only through international cooperation will it be possible for countries successfully to apply measures directed toward attaining and maintaining a high level of employment and income which must be the primary objective of economic policy.

3. The International Stabilization Fund of the United and Associated Nations is proposed as a permanent institution for international monetary cooperation. The re-

sources of this Fund would be available under adequate safeguards to maintain currency stability, while giving member countries time to correct maladjustments in their balance of payments without resorting to extreme measures destructive of international prosperity. The resources of the Fund would not be used to prolong a basically unbalanced international position. On the contrary, the Fund would be influential in inducing countries to pursue policies making for an orderly return to equilibrium.

4. The Fund would deal only with member governments and their fiscal agents, and would not intrude in the customary channels for conducting international commerce and finance. The Fund is intended to provide supplemental facilities for the successful functioning of the established foreign exchange institutions and to free international commerce from harmful restrictions.

5. The success of the Fund must ultimately depend upon the willingness of nations to act together on their common problems. International monetary cooperation should not be regarded as a matter of generosity. All countries have a vital interest in the maintenance of international monetary stability, and in the balanced growth of multilateral international trade.

#### **I. Purposes of the Fund**

The United Nations and the countries associated with them recognize, as declared in the Atlantic Charter, the need for the fullest cooperation among nations with the object of securing economic advancement and rising standards of living for all. They believe that attainment of these objectives will be facilitated by international monetary cooperation. Therefore, it is proposed that there be established an International Stabilization Fund with the following purposes:

1. To help stabilize the foreign exchange rates of the currencies of the United Nations and the countries associated with them.

2. To shorten the periods and lessen the degree of disequilibrium in the international balance of payments of member countries.

3. To help create conditions under which the smooth flow of foreign trade and of productive capital among the member countries will be fostered.

4. To facilitate the effective utilization of the blocked foreign balances accumulating in some countries as a consequence of the war situation.

5. To reduce the use of such foreign exchange restrictions, bilateral clearing arrangements, multiple currency devices, and discriminatory foreign exchange practices as hamper world trade and the international flow of productive capital.

## II. Composition of the Fund

1. The Fund shall consist of gold and the currencies and securities of member governments.

2. Each of the member countries shall subscribe a specified amount, to be called its *quota*. The aggregate of quotas of the member countries shall be the equivalent of at least \$5 billion.

3. Each member country shall meet its quota contribution in full on or before the date set by the Board of Directors for the Fund's operations to begin.

(a) A country shall pay in gold not less than an amount determined as follows. If its gold and free foreign exchange holdings are:

(i) In excess of three times its quota, it shall pay in gold 50 percent of its quota.

(ii) More than two but less than three times its quota, it shall pay in gold 40 percent of its quota plus 10 percent of its holdings in excess of twice its quota.

(iii) More than its quota but less than twice its quota, it shall pay in gold 30 percent of its quota plus 10 percent of its holdings in excess of its quota.

- (iv) Less than its quota, it shall pay in gold 30 percent of its holdings.

The gold payment required of a member country substantial parts of whose home areas have been wholly or partly occupied by the enemy, shall be only three-fourths of the above. (For other gold provisions, Cf. v-2-a and v-6, 7.)

A member country may include in the legal reserve account and in the published statement of the reserves of gold and foreign exchange in its Treasury or Central Bank, an amount not to exceed its gold contribution to the Fund, minus its net purchases of foreign exchange from the Fund paid for with local currency.

- (b) It shall pay the remainder of its quota in local currency, except that a member country may substitute government securities (redeemable at par) for local currency up to 50 percent of its quota.

4. A quota for each member country shall be computed by an agreed upon formula which gives due weight to the important relevant factors, *e. g.*, a country's holdings of gold and free foreign exchange, the magnitude and the fluctuations of its balance of international payments, its national income, *etc.*

Before computing individual quotas on the basis of the agreed upon formula, there shall be reserved an amount equal to 10 percent of aggregate quotas to be used as a special allotment for the equitable adjustment of quotas. Where the initial quota of a member country as computed by the formula is clearly inequitable, the quota may be increased from this special allotment.

5. Quotas shall be adjusted on the basis of the most recent data 3 years after the establishment of the Fund, and at intervals of 5 years thereafter, in accordance with the agreed upon formula. In the period between adjustment of quotas, the Fund may increase the quota of a country, where it is clearly inequitable, out of the special allotment reserved for the equitable adjustment of quotas.

6. Any changes in the formula by which the quotas of member countries are determined shall be made only with the approval of a four-fifths vote of the Board.

7. No increase shall be made in the quota of a member country under II-4, 5 or 6 without the consent of the representative of the country concerned.

8. The resources of the Fund shall be used exclusively for the benefit of the member countries.

### III. Monetary Unit of the Fund

1. The monetary unit of the Fund shall be the *unitas* (UN) equal in value to  $137\frac{1}{7}$  grains of fine gold (equivalent to \$10). No change in the gold value of the unitas shall be made except with the approval of 85 percent of the member votes. When such change is made, the gain or loss sustained by the Fund on its holdings of gold shall be distributed equitably among the members of the Fund.

The accounts of the Fund shall be kept and published in terms of unitas.

2. The value of the currency of each member country shall be established in terms of unitas and may not be altered except as provided in IV-5, below. (Cf. IV-1, 2, below.)

No member country shall purchase or acquire gold, directly or indirectly, at a price in terms of its national currency in excess of the parity which corresponds to the value of its currency in terms of unitas and to the value of unitas in terms of gold; nor shall any member country sell or dispose of gold, directly or indirectly, at a price in terms of its national currency below the parity which corresponds to the value of its currency in terms of unitas and to the value of unitas in terms of gold. (Cf. VII-1.)

3. No change in the value of the currencies of member countries shall be permitted to alter the value in unitas of the assets of the Fund. Whenever the currency of a

member country has depreciated to a significant extent, that country must deliver to the Fund when requested an amount of its local currency or securities equal to the decrease in the unitas value of the Fund's holdings of the local currency and securities of the country. Likewise, if the currency of a member country should appreciate to a significant extent, the Fund must return to that country an amount (in the currency or securities of that country) equal to the resulting increase in the unitas value of the Fund's holdings.

#### IV. Exchange Rates

1. The rates at which the Fund will buy and sell one member currency for another and at which the Fund will buy and sell gold for local currency shall be established in accordance with the provisions below. (Cf. also III-2 and v-2.)

2. The initial rates of exchange for member countries' currencies shall be determined as follows:

(a) For any country which becomes a member prior to the date on which the Fund's operations begin, the rates initially used by the Fund shall be based upon the value of the currency in terms of United States dollars which prevailed on July 1, 1943.

If, in the judgment of either the member country or the Fund, the above rate is clearly inappropriate, the initial rate shall be determined by consultation between the member country and the Fund. No operations in such currency shall be undertaken by the Fund until a rate has been established which has the approval of the Fund and of the member country in question.

(b) For any member country which has been occupied by the enemy, the Fund shall use the exchange rate fixed by the government of the liberated country in consultation with the Fund and acceptable to the Fund. Prior to the fixing of a definitive rate, operations in

such currency may be undertaken by the Fund with the approval of the Board at a tentative rate of exchange fixed by the member country in consultation with the Board. No operations shall be continued under this provision for more than 3 months after the liberation of the country or when the local currency holdings of the Fund exceed the quota of the country, except that under special circumstances the period and the amount of such operations may be extended by the Fund.

3. The Fund shall not come into operation until agreement has been reached on the exchange rates for currencies of countries representing a majority of the aggregate quotas:

4. The Fund shall determine the range within which the rates of exchange of member currencies shall be permitted to fluctuate. (Cf. VII-1.)

5. Changes in the exchange value of the currency of a member country shall be considered only when essential to the correction of fundamental disequilibrium in its balance of payments, and shall be made only with the approval of three-fourths of the member votes including the representative of the country concerned.

Because of the extreme uncertainties of the immediate post-war period, the following exceptional provisions may be used during the first 3 years of the Fund's operations:

- (a) When the existing rate of exchange of a member country is clearly inconsistent with the maintenance of a balanced international payments position for that country, changes from the established rate may be made at the special request of that country and with the approval of a majority of the member votes.
- (b) A member country may change the established rate for its currency by not more than 10 percent provided that the member country shall notify the Fund of its intention and shall consult with the Fund on the advisability of its action.

## V. Powers and Operations

1. The Fund shall have the following powers:

1. To buy, sell and hold gold, currencies, and government securities of member countries; to earmark and transfer gold; to issue its own obligations, and to offer them for discount or sale in member countries.

The Fund shall purchase for local currency or needed foreign exchange any member currency in good standing acquired by another member country in settlement of a balance of payments on current account, where such currency cannot be disposed of in the foreign exchange markets within the range established by the Fund.

2. <sup>The Fund may sell</sup> To sell to the Treasury of any member country (or Stabilization Fund or Central Bank acting as its agent) at the accepted rate of exchange, currency of any member country which the Fund holds, provided that:

(a) The foreign exchange demanded from the Fund is required to meet an adverse balance of payments predominantly on current account with any member country. (Cf. v-3, for capital transfers.)

When the gold and free foreign exchange holdings of a member country exceed 50 percent of its quota, the Fund in selling foreign exchange to such member country shall require that one-half of such exchange shall be paid for with gold or foreign exchange acceptable to the Fund. (Cf. v-6, 7; on gold collateral, see v-2-c.)

(b) The Fund's total holdings of the currency and securities of any member country shall not exceed the quota of such country by more than 50 percent during the first year of operation of the Fund, and thereafter shall not exceed such quota by more than 100 percent (except as otherwise provided below). The total holdings thus permitted are termed the *permissible quota* of a country. When the Fund's holdings of local currency and securities are equal to the permissible quota of a country, the Fund may sell foreign ex-

change for such additional local currency only with the specific approval of the Board of Directors (cf. VI-3-a, below), and provided that at least one of the following two conditions is met:

- (i) In the judgment of the Fund satisfactory measures are being or will be taken by the country whose currency is acquired by the Fund, to correct the disequilibrium in the country's balance of payments; or
- (ii) It is believed that the balance of payments of the country whose currency is acquired by the Fund will be such as to warrant the expectation that the excess currency holdings of the Fund can be disposed of within a reasonable time;

*Provided further*, that when the Fund's holdings of the currency of any member country or countries fall below 20 percent of their respective quotas, the sale shall also require the approval of the representatives of these countries.

- (c) When the Fund's holdings of local currency and securities exceed the permissible quota of a country, the Board may require the member country to deposit collateral in accordance with regulations prescribed by the Board. Such collateral shall take the form of gold, foreign or domestic currency or Government bonds, or other suitable collateral within the capacity of the member country.
- (d) When, in the judgment of the Fund, a member country, whose currency and securities held by the Fund exceed its quota, is exhausting its permissible quota more rapidly than is warranted, or is using its permissible quota in a manner that clearly has the effect of preventing or unduly delaying the establishment of a sound balance in its international accounts, the Fund may place such conditions upon additional sales of foreign exchange to that country as it deems to be in the general interest of the Fund.

*of such currencies*

3. The Fund may sell foreign exchange to a member country, under conditions prescribed by the Fund, to facilitate a transfer of capital, or repayment or adjustment of foreign debts, when in the judgment of the Board such a transfer is desirable from the point of view of the general international economic situation, provided the Fund's holdings of the currency and securities of the member country do not exceed 150 percent of the quota of that country. When the Fund's holdings of the local currency and securities of a member country exceed 150 percent of the quota of that country, the Fund may, in exceptional circumstances, sell foreign exchange to the member country for the above purposes with the approval of three-fourths of the member votes. (Cf. v-2-a, above; on voting, vi-3-a, below.)

4. When the Fund's holdings of the currency and securities of a member country become excessively small in relation to prospective acquisitions and needs for that currency, the Fund shall render a report to that country. The report shall embody an analysis of the causes of the depletion of the Fund's holdings of that currency, a forecast of the prospective balance of payments in the absence of special measures, and finally, recommendations designed to increase the Fund's holdings of that currency. The representative of the country in question shall be a member of the Fund committee appointed to draft the report. This report shall be sent to all member countries and, if deemed desirable, be made public. Member countries agree that they will give immediate and careful attention to recommendations made by the Fund.

5. Whenever it becomes evident to the Board of Directors that the anticipated demand for any particular currency may soon exhaust the Fund's holdings of that currency, the Fund shall inform the member countries of the probable supply of the currency and of a proposed method for its equitable distribution, together with suggestions for helping to equate the anticipated demand for and supply of that currency.

The Fund shall make every effort to increase the supply of the scarce currency by acquiring that currency from the foreign balances of member countries. The Fund may make special arrangements with any member country for the purpose of providing an emergency supply under appropriate conditions which are acceptable to both the Fund and the member country.

To facilitate appropriate adjustment in the balance of payments position of member countries, and to help correct the distortions in the pattern of trade balances, the Fund shall apportion its sales of such scarce currency. In such apportionment, it shall be guided by the principle of satisfying the most urgent needs from the point of view of the general international economic situation. It shall also consider the special needs and resources of the particular countries making the request for the scarce currency.

The right of any member country to acquire an amount of other currencies equal to its permissible quota shall be limited by the necessity of assuring an appropriate distribution among the various members of any currency the supply of which is scarce.

6. In order to promote the most effective use of the available and accumulating supply of foreign exchange resources of member countries, each member country agrees that it will offer to sell to the Fund, for its local currency or for foreign currencies which the member country needs, one-half of the foreign exchange resources and gold it acquires in excess of its official holdings at the time it became a member of the Fund, but no country need sell gold or foreign exchange under this provision unless its official holdings (*i. e.*, Treasury, Central Bank, Stabilization Fund, *etc.*) are in excess of 25 percent of its quota. For the purpose of this provision, only free and liquid foreign exchange resources and gold shall be considered. The Fund may accept or reject the offer. (Cf. II-3-a, V-2-a, and V-7.)

To help achieve this objective each member country agrees to discourage the excessive accumulation of foreign exchange resources and gold by its nationals. The Fund shall inform any member country when, in its opinion, any further growth of privately held foreign exchange resources and gold appears unwarranted.

7. When the Fund's holdings of the local currency and securities of a member country exceed the quota of that country, the Fund shall, upon request of the member country, resell to the member country the Fund's excess holdings of the currency of that country for gold or acceptable foreign exchange. (Cf. v-14, for charges on holdings in excess of quota.)

8. To buy from the governments of member countries, blocked foreign balances held in other member countries, provided all the following conditions are met:

- (a) The blocked balances are held in member countries and are reported as such (for the purpose of this provision) by the member governments and are verified by the Fund.
- (b) The member country selling the blocked balances to the Fund agrees to transfer these balances to the Fund and to repurchase from the Fund 40 percent of them (at the same price) with gold or such free currencies as the Fund may wish to accept, at the rate of 2 percent of the transferred balances each year for 20 years beginning not later than 3 years after the date of transfer.
- (c) The country in which the blocked balances are held agrees to transfer to the Fund the balances described in (b) above, and to repurchase from the Fund 40 percent of them (at the same price) with gold or such free currencies as the Fund may wish to accept, at the rate of 2 percent of the transferred balances each year for 20 years beginning not later than 3 years after the date of transfer.

- (d) A charge of 1 percent on the amount of blocked balances sold to the Fund, payable in gold, shall be levied against the country selling its blocked balances and against the country in which the balances are held. In addition a charge of not less than one percent, payable in gold, shall be levied annually against each country on the amount of such balances remaining to be purchased by it.
- (e) If the country selling blocked balances to the Fund asks for foreign exchange rather than local currency, the request will not be granted unless the country needs the foreign exchange for the purpose of meeting an adverse balance of payments not arising from the acquisition of gold, the accumulation of foreign balances, or other capital transactions.
- (f) Either country may, at its option, increase the amount it repurchases annually. But, in the case of the country selling blocked balances to the Fund, not more than 2 percent per annum of the original sum taken over by the Fund shall become free, and only after 3 years shall have elapsed since the sale of the balances to the Fund.
- (g) The Fund has the privilege of disposing of any of its holdings of blocked balances as free funds after the 23-year period is passed, or sooner under the following conditions:
- (i) Its holdings of the free funds of the country in which the balances are held fall below 20 percent of its quota; or
  - (ii) The approval is obtained of the country in which the balances are held.
- (h) The country in which the blocked balances are held agrees not to impose any restrictions on the use of the installments of the 40 percent portion gradually repurchased by the country which sold the balances to the Fund.
- (i) The Fund agrees not to sell the blocked balances acquired under the above authority, except with the

permission or at the request of the country in which the balances are being held. The Fund may invest these balances in the ordinary or special government securities of that country. The Fund shall be free to sell such securities in any country under the provisions of v-11, below.

- (j) The Fund shall determine from time to time the maximum proportion of the blocked balances it will purchase under this provision.

*Provided, however,* that during the first 2 years of its operation, blocked balances purchased by the Fund shall not exceed in the aggregate 10 percent of the quotas of all member countries. At the end of 2 years of operation, the Fund shall propose a plan for the gradual further liquidation of blocked balances still outstanding indicating the proportion of the blocked balances which the Board considers the Fund can appropriately purchase.

Blocked balances acquired under this provision shall not be included either in computing the amount of foreign exchange available to member countries under their quotas (cf. v-2, 3), or in computing charges on balances of local currency in excess of the quotas (cf. v-14).

9. To buy and sell currencies of non-member countries but shall not acquire more than \$10 million of the currency of any one non-member country nor hold such currencies beyond 60 days after date of purchase except with the approval of the Board.

10. To borrow the currency of any member country provided the additional amount is needed by the Fund and provided the representative of that country approves.

11. To sell member-country obligations owned by the Fund provided that the representatives of the country issuing the securities and of the country in which the securities are to be sold approve, except that the approval of the representative of the issuing country shall not be necessary if the obligations are to be sold in its own market.

To use its holdings to obtain rediscounts or advances from the Central Bank of any country whose currency the Fund needs.

12. To invest any of its currency holdings in government securities of the country of that currency provided that the representative of the country approves.

13. To lend to any member country its local currency from the Fund for 1 year or less up to 75 percent of the currency of that country held by the Fund, provided the local currency holdings of the Fund are not reduced below 20 percent of the quota.

14. To make a service charge on all gold and exchange transactions.

To levy a charge uniform to all countries, at a rate not less than 1 percent per annum, payable in gold, against any country on the amount of its currency held by the Fund in excess of the quota of that country. An additional charge, payable in gold, shall be levied by the Fund against any member country on the Fund's holdings of its currency in excess of the permissible quota of that country.

In case the Fund finds it necessary to borrow currency to meet the demands of its members, an additional charge, payable in gold, shall be made by the Fund sufficient to cover the cost of the borrowing.

15. To levy upon member countries a *pro rata* share of the expenses of operating the Fund, payable in local currency, not to exceed one-tenth percent per annum of the quota of each country. The levy may be made only to the extent that the earnings of the Fund are inadequate to meet its current expenses.

16. The Fund shall deal only with or through:

- (a) The Treasuries, Stabilization Funds, or Central Banks acting as fiscal agents of member governments.
- (b) Any international banks owned predominantly by member governments.

The Fund may, nevertheless, with the approval of the representatives of the governments of the countries concerned, sell its own securities, or securities it holds, directly to the public or to institutions of member countries.

#### VI. Management

1. The administration of the Fund shall be vested in a Board of Directors. Each government shall appoint a director and an alternate, in a manner determined by it, who shall serve for a period of 5 years, subject to the pleasure of their government. Directors and alternates may be reappointed.

2. In all voting by the Board, the director or alternate of each member country shall be entitled to cast an agreed upon number of votes.

The distribution of *basic votes* shall be closely related to the quotas of member countries, although not in precise proportion to the quotas. An appropriate distribution of basic voting power would seem to be the following: Each country shall have 100 votes, plus 1 vote for the equivalent of each 100,000 unitas (\$1 million) of its quota.

No country shall be entitled to cast more than one-fifth of the aggregate basic votes, regardless of its quota.

3. All voting shall be according to basic votes except as follows:

- (a) In voting on proposals to authorize the sale of foreign exchange, each country shall cast a number of votes modified from its basic vote:
  - (i) By the addition of one vote for each \$2 million of net sales of its currency by the Fund (adjusted for its net transactions in gold), and
  - (ii) By the subtraction of one vote for each \$2 million of its net purchases of foreign exchange from the Fund (adjusted for its net transactions in gold).
- (b) In voting on proposals to suspend or restore membership, each member country shall cast one vote, as provided in VI-11, below.

4. All decisions, except where specifically provided otherwise, shall be made by a majority of the member votes.

5. The Board of Directors shall select a Managing Director of the Fund and one or more assistants. The Managing Director shall become an *ex officio* member of the Board and shall be chief of the operating staff of the Fund. The operating staff shall be selected in accordance with regulations established by the Board of Directors.

6. The Board of Directors shall appoint from among its members an Executive Committee of not less than 11 members. The Chairman of the Board shall be Chairman of the Executive Committee, and the Managing Director of the Fund shall be an *ex officio* member of the Executive Committee.

The Executive Committee shall be continuously available at the head office of the Fund and shall exercise the authority delegated to it by the Board. In the absence of any member of the Executive Committee, his alternate shall act in his place. Members of the Executive Committee shall receive appropriate remuneration.

7. The Board of Directors may appoint such other committees as it finds necessary for the work of the Fund. It may also appoint advisory committees chosen wholly or partially from persons not employed by the Fund.

8. The Board of Directors may at any meeting authorize any officers or committees of the Fund to exercise any specified powers of the Board not requiring more than a majority vote.

The Board may delegate any authority to the Executive Committee, provided that the delegation of powers requiring more than a majority of the member votes can be authorized only by a majority (of the Board) of the same size as specified, and can be exercised by the Executive Committee only by like majority.

Delegated powers shall be exercised only until the next meeting of the Board, and in a manner consistent with the general policies and practices of the Board.

9. The Board of Directors may establish procedural regulations governing the operations of the Fund. The officers and committees of the Fund shall be bound by such regulations.

10. The Board of Directors shall hold an annual meeting and such other meetings as it may be desirable to convene. The annual meeting shall be held in places designated by the Executive Committee, but not more than one annual meeting in any 5-year period shall be held within the same member country.

On request of member countries casting one-fourth of the votes, the Chairman shall call a meeting of the Board for the purpose of considering any matters placed before it.

11. A country failing to meet its obligations to the Fund may be suspended provided a majority of the member countries so decides. While under suspension, the country shall be denied the privileges of membership but shall be subject to the same obligations as any other member of the Fund. At the end of 1 year the country shall be automatically dropped from membership unless it has been restored to good standing by a majority of the member countries.

Any country may withdraw from the Fund by giving notice, and its withdrawal will take effect 1 year from the date of such notice. During the interval between notice of withdrawal and the taking effect of the notice, such country shall be subject to the same obligations as any other member of the Fund.

A country which is dropped or which withdraws from the Fund shall have returned to it an amount in its own currency equal to its contributed quota, plus other obligations of the Fund to the country, and minus any sum owed by that country to the Fund. Any losses of the

Fund may be deducted *pro rata* from the contributed quota to be returned to the country that has been dropped or has withdrawn from membership. Local currency holdings of the Fund in excess of the above shall be repurchased by that country with gold or foreign exchange acceptable to the Fund.

When any country is dropped or withdraws from membership, the rights of the Fund shall be fully safeguarded. The obligations of a country to the Fund shall become due at the time it is dropped or withdraws from membership; but the Fund shall have 5 years within which to liquidate its obligations to such country.

12. Net profits earned by the Fund shall be distributed in the following manner:

- (a) Fifty percent to reserves until the reserves are equal to 10 percent of the aggregate quotas of the Fund.
- (b) Fifty percent to be divided each year among the members in proportion to their quotas. Dividends distributed to each country shall be paid in its own currency or in gold at the discretion of the Fund.

#### VII. Policies of Member Countries

Each member country of the Fund undertakes the following:

1. To maintain by appropriate action exchange rates established by the Fund on the currencies of other countries, and not to alter exchange rates except as provided in IV-5, above.

Exchange rates of member countries may be permitted to fluctuate within the specified range fixed by the Fund.

2. Not to engage in exchange dealings with member or non-member countries that will undermine stability of exchange rates established by the Fund.

3. To abandon, as soon as the member country decides that conditions permit, all restrictions (other than those involving capital transfers) over foreign exchange trans-

actions with other member countries, and not to impose any additional restrictions (except upon capital transfers) without the approval of the Fund.

The Fund may make representations to member countries that conditions are favorable for the abandonment of restrictions over foreign exchange transactions, and each member country shall give consideration to such representations.

All member countries agree that all of the local currency holdings of the Fund shall be free from any restrictions as to their use. This provision does not apply to blocked foreign balances acquired by the Fund in accordance with the provisions of v-8, above.

4. To cooperate effectively with other member countries when such countries, with the approval of the Fund, adopt or continue controls for the purpose of regulating international movements of capital. Cooperation shall include, upon recommendation by the Fund, measures that can appropriately be taken, such as:

- (a) Not to accept or permit acquisition of deposits, securities, or investments by nationals of any member country imposing restrictions on the export of capital except with the permission of the government of that country and the Fund;
- (b) To make available to the Fund or to the government of any member country such information as the Fund considers necessary on property in the form of deposits, securities and investments of the nationals of the member country imposing the restrictions.

5. Not to enter upon any new bilateral clearing arrangements, nor engage in multiple currency practices, which in the judgment of the Fund would retard the growth of world trade or the international flow of productive capital.

6. To give consideration to the views of the Fund on any existing or proposed monetary or economic policy,

the effect of which would be to bring about sooner or later a serious disequilibrium in the balance of payments of other countries.

7. To furnish the Fund with all information it needs for its operations and to furnish such reports as the Fund may require in the form and at the times requested by the Fund.

8. To adopt appropriate legislation or decrees to carry out its undertakings to the Fund.
