

EBS/84/20

CONFIDENTIAL

January 27, 1984

To: Members of the Executive Board  
From: The Secretary  
Subject: International Banking Statistics

Attached for the information of the Executive Directors is a paper containing updates and revisions of the tables appearing in EBS/83/238 (11/7/83), with a brief description of their contents.

If Executive Directors have technical or factual questions relating to this paper, they should contact Mr. O'Connor (ext. (5)7942) or Mr. Joyce (ext. (5)7946).

Att: (1)

INTERNATIONAL MONETARY FUND

International Banking Statistics

Prepared by the Bureau of Statistics

Approved by Werner Dannemann

January 25, 1984

The first results of the Fund's project on international banking statistics were circulated to the Executive Board in International Banking Statistics (EBS/83/238, November 7, 1983), as background for the Executive Board seminar on external debt policies on December 12, 1983. During the seminar, Executive Directors expressed support for the Fund's work on international banking statistics and for the regular publication of aggregate data in International Financial Statistics (IFS).

Six new tables on international banking statistics were introduced in the January 1984 issue of IFS, with data on area and world developments current to end-June 1983. It has now been possible to update the global measures to end-September 1983. The attached tables present the data as they will be published (subject to any further updates) in the February 1984 issue of IFS.

A brief resume of the structure of the tables is as follows: IFS data provide information on the external assets and liabilities of each country's banking system, while quarterly reports from selected international banking centers, when combined, provide information on recourse by sectors other than banks, in each country, to international banks. The following analysis may be envisaged of funds received by residents of each borrowing country: 1/

---

1/ Monthly data are derived from the regular reports of resident banks' external positions made, for IFS purposes, by the authorities in over 100 countries. Quarterly data are derived from the expanded geographic analysis of resident banks' external positions made by 18 international banking centers.

| <u>Sector in Borrowing Country</u> | <u>Foreign Lending Source</u> | <u>Data Availability</u> |
|------------------------------------|-------------------------------|--------------------------|
| Banks <u>1/</u>                    | Banks                         | Monthly (Table 1a)       |
| Nonbanks                           | Banks                         | Quarterly (Table 2a)     |
| Banks                              | Nonbanks                      | Monthly (Table 3a)       |
| (Nonbanks)                         | (Nonbanks)                    | (Not available)          |

While the above classification focuses on borrowing country positions, the data can be recast to analyze the placement of funds abroad by residents of each lending country:

| <u>Sector in Lending Country</u> | <u>Foreign Destination</u> | <u>Data Availability</u> |
|----------------------------------|----------------------------|--------------------------|
| Banks <u>1/</u>                  | Banks                      | Monthly (Table 1b)       |
| Banks                            | Nonbanks                   | Monthly (Table 2b)       |
| Nonbanks                         | Banks                      | Quarterly (Table 3b)     |
| (Nonbanks)                       | (Nonbanks)                 | (Not available)          |

The two analyses should produce comparable global measures of international banking activity. In view of this global symmetry, the data are presented in three pairs of tables.

---

1/ Bank to bank positions include external positions of monetary authorities with nonresident deposit banks.
