ROOM C-525            0424

EB/CQuota/95/3

November 15, 1995

To:        Members of the Committee of the Whole  
            on Review of Quotas

From:      The Secretary

Subject:    Eleventh General Review of Quotas - Illustrative Quota  
Calculations

---

There is attached a paper on illustrative quota calculations for individual members in connection with the Eleventh General Review of Quotas.

Ms. Wagner (ext. 37808) or Ms. Westin (ext. 34982) is available to answer technical or factual questions relating to this paper prior to the Committee's discussion scheduled for Monday, December 4, 1995.

Department Heads

INTERNATIONAL MONETARY FUND

Eleventh General Review of Quotas: Illustrative Quota Calculations

Prepared by the Treasurer's Department

Approved by David Williams

November 15, 1995

This paper presents the illustrative quota calculations for individual members, which are based on the assumed size of the overall increase in quotas of 60 percent, 75 percent, or 100 percent, i.e., sizes of the Fund of SDR 231 billion, SDR 252 billion, or SDR 288 billion, as was indicated in "Illustrative Distributions of Increases in Quotas" (EB/CQuota/95/2, 11/14/95). The equiproportional element of the quota increase has been set illustratively at 75 percent or 90 percent of the overall increase; the balance, the selective element, has therefore been set at 25 percent or 10 percent of the overall increase.

The three techniques used to allocate the selective element of the overall quota increase, as discussed in EB/CQuota/95/2, are: (i) Method A, which allocates the selective element in proportion to members' shares in calculated quotas; (ii) Method B, which distributes the selective increase to only those (38) members, or a subset of these members, whose shares in calculated quotas exceed their shares in present quotas. Under this method, the selective increase is distributed in proportion to the absolute excess of a member's calculated quota over its actual quota; and (iii) Method D, which combines Method A with a technique providing for a further (selective) increase in quotas which becomes progressively larger the larger the discrepancy between the member's shares in calculated and actual quotas.

Table 1 provides the illustrative calculations using Method A with a 75/25 apportionment of equiproportional/selective increases. The illustrative calculations in Tables 2 through 4 use Method B with a 90/10 apportionment of equiproportional/selective increases; these calculations provide for selective increases under three alternative assumptions: (i) in Table 2, to those members whose ratio of calculated to actual quota share exceeds 1.0 (denoted as the cutoff ratio); (ii) in Table 3, to those members with a cutoff ratio higher than 1.3; and (iii) in Table 4, to those members with a cutoff ratio in excess of 1.5. Table 5 provides illustrative calculations using Method D, which is based on Method A under which the overall increase is apportioned to provide for a 75 percent equiproportional component and which provides for a further 25 percent selective increase in quotas which becomes progressively larger the larger the discrepancy between a member's share in calculated quotas

from its share in actual quotas. Finally, Tables 6A through 6C show the illustrative shares in voting power for each of the above methods under the three assumed illustrative sizes of the Fund, respectively.

It should be noted that, as indicated in EB/CQuota/95/2, quota calculations have not yet been made for several members because of lack of data (Afghanistan, Iraq, Liberia, and Somalia), or because the data have not yet been assembled for a recent new member (Brunei Darussalam). Accordingly, the data on quota shares and voting shares presented in Tables 1-6 are presented based on the membership excluding the aforementioned members.

Table 1. Illustrative Quotas Based on Method A with  
Equiproportional/Selective Increases of 75/25 Percent

(In millions of SDRs, except as indicated)

|                | Illustrative Quotas |            |          |          |          | Quota Shares (in percent) |         |         |
