<sup>1/</sup> The figures in the table are not comparable among countries since they are based on the differing labor force definitions and concepts used by the respective national statistical agencies. For classification of countries in groups shown here, see the introduction to this appendix.

<sup>2/</sup> Composites for the country groups are averages of percentage changes for individual countries weighted by the average U.S. dollar value of their respective GNPs over the preceding three years.

<sup>3/</sup> National unemployment rates weighted by labor force in the respective countries.

<sup>4/</sup> Figures for 1967 to 1976 have been adjusted by the staff to allow for a discontinuity in Italian labor force statistics.
