From: The Secretary

Subject: World Economic Outlook - Statistical Appendix

The attached statistical appendix provides background material for the Executive Board discussion on Friday, March 25, 1988 of the paper on prospects and policy issues related to the world economic outlook (EBS/88/44, 3/3/88).

Mr. Larsen (ext. 4613) or Mr. Gorne (ext. 4616) is available to answer technical or factual questions relating to this paper prior to the Board discussion.

Introduction

Assumptions and Conventions

The statistical tables in this appendix have been compiled on the basis of information available on or before February 19, 1988. The recording of the figures for 1987 and beyond with the same degree of precision as the historical figures is solely a matter of convenience. It is not intended to convey any connotation regarding the degree of accuracy attaching to these estimates and projections.

The estimates and projections for 1988 and 1989 are predicated on a number of assumptions and working hypotheses:

(1) for the major currencies, the average exchange rates of January 1988 will remain unchanged in real terms through the end of 1989;

(2) "present" policies of national authorities will be maintained; and

(3) the price of oil is assumed to remain unchanged in dollar terms in 1988 from the level prevailing in December 1987, and to remain unchanged in real terms thereafter.

A few of the tables include series expressed in SDRs (or based on SDR values). The U.S. dollar/SDR conversion rates used in this report are, for the historical period, the geometric averages of daily rates given in the Fund's International Financial Statistics (IFS). For the years prior to 1970, these data impute to the SDR a value of US\$1.00. For 1988 and 1989, the exchange rate assumptions specified above imply average U.S. dollar/SDR conversion rates of 1.366 and 1.375, respectively.

Classification of Countries

The classification scheme used in the preparation of this report is as follows.

Industrial countries comprise:

Australia	Germany, Fed. Rep. of	New Zealand
Austria	Iceland	Norway
Belgium	Ireland	Spain
Canada	Italy	Sweden
Denmark	Japan	Switzerland
Finland	Luxembourg	United Kingdom
France	Netherlands	United States

The seven largest countries in this group in terms of GNP--Canada, the United States, Japan, France, the Federal Republic of Germany, Italy, and the United Kingdom--are collectively referred to as the major industrial countries.

The developing countries include all other Fund members (as of January 15, 1988), together with certain essentially autonomous dependent territories for which adequate statistics are available. ^{1/} The regional breakdowns of data for developing countries conform to the regional classification used in the Fund's IFS. It should be noted that, in this classification, Egypt and Libyan Arab Jamahiriya are classified as part of the Middle East, not Africa.

The analytical groupings in this classification are (1) countries grouped by predominant export; (2) countries grouped by financial criteria; (3) countries grouped by other criteria; and (4) countries grouped by former classification criteria (Table A). At present, the financial criteria first distinguish among capital exporting and capital importing countries. Countries in the latter, much larger, group are then distinguished on the basis of two additional financial criteria: by predominant type of creditor and by the degree of debt-servicing difficulties they have faced. The country groups shown under the heading of "miscellaneous criteria" include capital importing fuel exporters; fifteen heavily indebted countries; small low-income countries; and sub-Saharan Africa (excluding Nigeria and South Africa). The accompanying table presents a breakdown of these analytical groupings according to the proportion of developing country

^{1/} It should be noted that the term "country" used in this publication does not in all cases refer to a territorial entity that is a state as understood by international law and practice. The term also covers some territorial entities that are not states but for which data are maintained and provided internationally on a separate and independent basis.

GDP, exports of goods and services, and level of indebtedness. Further details on the classification scheme are given below.

The first analytical criterion used to group developing countries is by predominant export category. Four categories are distinguished: fuel (SITC (Standard International Trade Classification) 3); other primary commodities (SITC 0,1,2, 4, and diamonds and gemstones); manufactures (SITC 5 to 8, less diamonds and gemstones); and "services and remittances." On the basis of data for 1980, countries are assigned to the commodity grouping that accounts for 50 percent or more of their exports. Specifically, countries are assigned to the "services and remittances" category if their receipts on these transactions account for at least half of their exports of goods and services. If countries do not meet this criterion, they are assigned to the trade category (of the three listed above) that accounts for at least half of their total merchandise exports. ^{1/}

Given these definitions, the fuel exporters comprise:

Algeria	Kuwait	Syrian Arab Rep.
Bahrain	Libyan Arab	Trinidad and
Congo	Jamahiriya	Tobago
Ecuador	Mexico	Tunisia
Gabon	Nigeria	United Arab
Indonesia	Oman	Emirates
Iran, Islamic Rep. of	Qatar	Venezuela
Iraq	Saudi Arabia	

The primary product exporters, that is, countries whose exports of agricultural and mineral primary products other than fuel accounted for over 50 percent of their total exports in 1980, comprise:

Afghanistan	Gambia, The	Peru
Argentina	Ghana	Philippines
Bangladesh	Guatemala	Rwanda
Belize	Guinea	São Tomé and
Benin	Guinea-Bissau	Principe
Bhutan	Guyana	Senegal
Bolivia	Haiti	Sierra Leone
Botswana	Honduras	Solomon Islands
Brazil	Jamaica	Somalia
Burma	Kenya	South Africa
Burundi	Lao People's	Sri Lanka
Cameroon	Dem. Rep.	St. Kitts and
Central African	Liberia	Nevis
Rep.	Madagascar	Sudan

^{1/} Two countries that did not meet any of the above criteria were assigned to the trade category that accounted for the largest share of their exports.

^{1/} Excluding Nigeria and South Africa.

Chad	Malawi	Suriname
Chile	Malaysia	Swaziland
Colombia	Mali	Tanzania
Comoros	Mauritania	Thailand
Costa Rica	Mauritius	Togo
Côte d'Ivoire	Morocco	Uganda
Djibouti	Mozambique	Uruguay
Dominican Rep.	Nicaragua	Viet Nam
El Salvador	Niger	Zaire
Equatorial Guinea	Papua New Guinea	Zambia
Ethiopia	Paraguay	Zimbabwe
Fiji		

A further distinction is made among the "primary product exporters" on the basis of whether countries' exports of primary commodities (other than fuel) consisted primarily of agricultural (SITC 0, 1, 2 except 27, 28, and 4) or mineral (SITC 27 and 28 and diamonds and gemstones) commodities. The mineral exporters comprise:

Bolivia	Liberia	South Africa
Botswana	Mauritania	Suriname
Chile	Morocco	Togo
Guinea	Niger	Zaire
Guyana	Peru	Zambia
Jamaica	Sierra Leone	Zimbabwe

The agricultural exporters are those non-fuel primary product exporters that are not also mineral exporters.

The exporters of manufactures (that is, those countries or areas whose exports of manufactures accounted in 1980 for over 50 percent of total exports) comprise:

China	Korea	Taiwan, Province
Hong Kong	Poland	of China
Hungary	Romania	Turkey ^{1/}
India	Singapore	Yugoslavia
Israel		

The service and remittance countries, that is, those countries whose receipts from services (such as tourism) and private transfers (such as workers' remittances) amount to at least 50 percent of their exports of goods and services, comprise:

^{1/} Although Turkey's exports of manufactures fell short of 50 percent of its total exports in 1980, its share of manufactures has since increased to such an extent that a reclassification to the group of exporters of manufactures is justified. A forthcoming review of the World Economic Outlook's country classification system may result in the reclassification of countries in situations similar to that of Turkey.

Antigua and Barbuda	Lebanon	St. Vincent
Bahamas, The	Lesotho	Tonga
Barbados	Maldives	Vanuatu
Burkina Faso	Malta	Western Samoa
Cape Verde	Nepal	Yemen Arab
Cyprus	Netherlands	Rep.
Dominica	Antilles	Yemen,
Egypt	Pakistan	People's
Greece	Panama	Dem. Rep
Grenada	Portugal	of
Jordan	Seychelles	
Kampuchea, Democratic	St. Lucia	

The primary product exporters, exporters of manufactures, and service and remittance countries taken together are referred to as the "non-fuel exporters."

A second set of analytical groupings of developing countries is based on financial criteria. A first distinction is made between those developing countries that have traditionally been capital exporters and those that have traditionally been capital importers. At present, capital exporters are defined as those developing countries that, on average, recorded a current account surplus during the period 1979-81 and were aid donors over the same period. The capital exporting countries comprise:

Iran, Islamic	Libyan Arab	Saudi Arabia
Rep. of	Jamahiriya	United Arab
Iraq	Oman	Emirates
Kuwait	Qatar	

The capital importing countries comprise all other developing countries.

Within the group of capital importing developing countries and areas, two types of financial distinction are made. The first distinguishes among countries and areas on the basis of their predominant type of creditor. Market borrowers are defined as those countries that obtained at least two thirds of their external borrowings from 1978 to 1982 from commercial creditors. The group comprises:

Algeria	Côte d'Ivoire	Malaysia	Portugal
Antigua and	Cyprus	Mexico	Singapore
Barbuda	Ecuador	Nigeria	South Africa
Argentina	Gabon	Panama	Taiwan, Province
Bahamas, The	Greece	Papua New	of China
Bolivia	Hong Kong	Guinea	Trinidad
Brazil	Hungary	Paraguay	and Tobago
Chile	Indonesia	Peru	Uruguay
Colombia	Korea	Philippines	Venezuela
Congo			Yugoslavia

Official borrowers comprise those countries, except China and India, that obtained two thirds or more of their external borrowings from 1978 to 1982 from official creditors. The countries are:

Afghanistan	Fiji	Malta	Swaziland
Bahrain	Gambia, The	Mauritania	Syrian Arab
Bangladesh	Ghana	Nepal	Rep.
Bhutan	Grenada	Netherlands	Tanzania
Burkina Faso	Guatemala	Antilles	Togo
Burma	Guinea	Nicaragua	Tonga
Burundi	Guinea-	Pakistan	Uganda
Cape Verde	Bissau	Rwanda	Viet Nam
Central	Guyana	São Tomé	Western
African	Honduras	and	Samoa
Rep.	Jamaica	Principe	Yemen Arab
Chad	Jordan	Senegal	Rep.
Comoros	Lao People's	Seychelles	Yemen,
Djibouti	Dem. Rep.	Sierra	People's
Dominica	Liberia	Leone	Dem.
Dominican	Madagascar	Somalia	Rep. of
Rep.	Malawi	St. Lucia	Zaire
El Salvador	Maldives	St. Vincent	Zambia
Equatorial	Mali	Sudan	
Guinea			

Diversified borrowers comprise those capital importing developing countries that are not market or official borrowers. These countries' external borrowings in 1978-82 were more or less evenly divided between official and commercial creditors. China and India are included in this group. Commercial borrowers comprise those countries classified as either market or diversified borrowers.

A second financial distinction among capital importing developing countries is based on whether countries have or have not experienced debt-servicing difficulties in the recent past. Countries that have experienced debt-servicing problems are defined as those countries which incurred external payments arrears during 1985 or rescheduled their debt during the period from end-1983 to end-1986 as reported in the relevant issues of the Fund's Annual Report on Exchange Arrangements and Exchange Restrictions. Countries classified as not having experienced debt-servicing problems are defined as all other capital importing developing countries.

Several other analytical groups are also used in the report. One of these is the group of capital importing fuel exporters. This group, which is also referred to as the "indebted fuel exporters," comprises those 12 fuel exporters that are not capital exporters. A second is the group of fifteen heavily indebted countries. This group comprises:

Argentina	Côte d'Ivoire	Peru
Bolivia	Ecuador	Philippines

Brazil	Mexico	Uruguay
Chile	Morocco	Venezuela
Colombia	Nigeria	Yugoslavia

A third is the group of small low-income countries, comprising those Fund members, excluding China and India, whose per capita GDP, as estimated by the World Bank, did not exceed the equivalent of \$410 in 1980. The countries in this group are:

Afghanistan	Equatorial	Lao People's	São Tomé
Bangladesh	Guinea	Dem. Rep.	and
Benin	Ethiopia	Madagascar	Principe
Bhutan	Gambia, The	Malawi	Sierra Leone
Burkina Faso	Ghana	Maldives	Somalia
Burma	Guinea	Mali	Sri Lanka
Burundi	Guinea-	Mauritania	Sudan
Cape Verde	Bissau	Mozambique	Tanzania
Central	Guyana	Nepal	Togo
African	Haiti	Niger	Uganda
Rep.	Kampuchea	Pakistan	Viet Nam
Chad	Democratic	Rwanda	Zaire
Comoros	Kenya		

Reference is also made to sub-Saharan Africa, which comprises all African countries (as defined in IFS) except Algeria, Morocco, Nigeria, South Africa, and Tunisia.

Finally, in the classification used in Fund publications until recently, the developing countries were divided into two groups--"oil exporting countries" ^{1/} and "non-oil developing countries." The countries included under the heading oil exporting countries were:

Algeria	Kuwait	Qatar
Indonesia	Libyan Arab	Saudi Arabia
Iran, Islamic	Jamahiriya	United Arab
Rep. of	Nigeria	Emirates
Iraq	Oman	Venezuela

The remaining countries, grouped under the heading non-oil developing countries, were further disaggregated into subgroupings based primarily on the character of the countries' economic activity and on the predominant composition of their exports.

^{1/} The countries included here were those whose oil exports (net of any imports of crude oil) both accounted for at least two thirds of total exports and were at least 100 million barrels a year (roughly equivalent to 1 percent of annual world exports). These criteria were applied to 1978-80 averages.

Except where otherwise specifically indicated, the Union of Soviet Socialist Republics, nonmember countries of Eastern Europe, Cuba, and North Korea are excluded from the tables in this report. Also, it has not been possible to include in the tables a number of small countries or territories for which trade and payments data are not available.

¹ Real GDP (or GNP) for industrial and developing countries and real net material product (NMP) for other countries. Composites for the country groups are averages of percentage changes for individual countries weighted by the average U.S. dollar value of their respective GDPs (GNPs or NMPs where applicable) over the preceding three years. Because of the uncertainty surrounding the valuation of the composite NMP of the other countries, they have been assigned—somewhat arbitrarily—a weight of 15 percent in the calculation of the growth of world output.

² Compound annual rates of change. Excluding China.

³ The U.S.S.R. and countries of Eastern Europe that are not members of the Fund.

¹ Composites for the country groups are averages of percentage changes for individual countries weighted by the average U.S. dollar value of their respective GNPs over the preceding three years.

² From fourth quarter of preceding year.

³ M1 is generally currency in circulation plus private demand deposits. In addition, Canada excludes private sector float; the United States includes traveler's checks of nonbank issues and other checkable deposits and excludes private sector float and demand deposits of banks; the Federal Republic of Germany includes demand deposits at fixed interest rates; and Japan includes government demand deposits and excludes float.

⁴ M1 plus quasi-money—generally "M2," except for the United Kingdom, Japan, and the Federal Republic of Germany, for which the data are based on M3, M2 + CD, and M3, respectively. Quasi-money is essentially private term deposits and other notice deposits. The United States also includes money market mutual fund balances, money market deposit accounts, overnight repurchase agreements, and overnight Eurodollars issued to U.S. residents by foreign branches of U.S. banks. France also includes government savings bonds. For the United Kingdom, M3 is M1 plus private sterling time deposits. For Japan, M2 + CD is currency in circulation plus total private and public sector deposits and installments of Sogo Banks plus certificates of deposit. For the Federal Republic of Germany, M3 is M1 plus private time deposits with maturities of less than four years plus savings deposits at statutory notice.

¹ Composites for the country groups are weighted averages of the individual national ratios for each year, with weights proportionate to the U.S. dollar value of the respective GNPs in the preceding three years.

² Canada, France, Italy and the United Kingdom : in percent of GDP.

³ Data for Canada and the United Kingdom are on a national income accounts basis.

⁴ Data for the United States are on a unified budget basis.

⁵ Data for Japan cover the consolidated operations of the general account, certain special accounts, social security transactions, and disbursements of the fiscal investment and loan program (FILP) except those to financial institutions. Japanese data other than FILP transactions are based on national income accounts.

⁶ Data for France are on an administrative basis and exclude social security transactions.

⁷ Data for the Federal Republic of Germany are on an administrative basis and exclude social security transactions.

⁸ Data for Italy refer to the state sector and cover the transactions of the state budget as well as those of several autonomous entities operating at the same level but do not include the gross transactions of social security institutions, only their deficits.

Data from 1980 are not comparable with those for 1979 because they are based on a recent revision of the national income accounts. The fiscal impulse estimate of the April 1987 *World Economic Outlook* is shown for the transitional year 1980.

¹ Data are on a national income accounts basis. Composites for the country groups are weighted averages of the individual national ratios for each year, with weights proportionate to the U.S. dollar value of the respective GNPs in the preceding three years.

² Canada, France, Italy, and the United Kingdom: in percent of GDP.

³ Data from 1980 are not comparable with those for 1979 because they are based on a recent revision of the national income accounts. The fiscal impulse estimate of the April 1987 *World Economic Outlook* is shown for the transitional year 1980.

⁴ General government, on an administrative basis, excluding social security transactions.

¹ Compound annual rates of change. Excluding China.² Averages of growth rates for world exports and imports based on data for the two groups of countries shown separately below and on partly estimated data for the U.S.S.R. and nonmember countries of Eastern Europe. Estimates of the growth of world trade are uncertain, and appear especially so in 1986. The GATT Secretariat estimates that world trade rose by only 3½ percent, significantly less than the Fund staff's estimate of about 4½ percent. This difference results mainly from the choice of data used for the United States and nonmember countries.³ For years prior to 1970, an imputed value of US\$1.00 has been assigned to the SDR.⁴ As represented, respectively, by the export unit value index for the manufactures of the industrial countries; the oil export unit value of the oil exporting countries (according to the former analytical categories); and the index of market quotations for non-oil primary commodities exported by the developing countries.

¹ Including official transfers.

² Covers estimated balances on current transactions only in convertible currencies of the U.S.S.R. and nonmember countries of Eastern Europe.

³ Reflects errors, omissions, and asymmetries in reported balance of payments statistics on current account, plus balance of listed groups with countries not included.

⁴ Staff estimates of the difference between the beginning-of-year and end-of-year "float," that is, the value of those exports that have not yet been recorded as imports (usually because the goods are in transit or because of delays in the processing of the documentation). The estimates should be viewed only as rough orders of magnitude.

NOTE: Except where otherwise footnoted, estimates shown here are based on national balance of payments statistics, which are not always easily reconcilable with year-to-year changes in either debtor- or creditor-reported debt statistics, in part because the latter are affected by changes in valuation.

¹ Equivalent to current account deficit less official transfers. For purposes of this table, official transfers are treated as external financing.

² Pertains primarily to export credit.

³ Positioned here on the presumption that estimates reflect primarily unrecorded capital outflows.

⁴ Comprises short-term borrowing by monetary authorities from other monetary authorities.

⁵ Includes use of Fund credit under General Resources Account, Trust Fund, Structural Adjustment Facility and Enhanced Structural Adjustment Facility. The impact of prospective programs is incorporated. Further details are given in Table A45.

⁶ Estimates of net disbursements by official creditors (other than monetary authorities) derived from debt statistics reported in Tables A47-A49. Official net disbursements include the increase in official claims caused by the transfer of officially guaranteed claims to the guarantor agency in the creditor country, usually in the context of debt reschedulings.

⁷ Residually calculated. Except for discrepancies in coverage, amounts shown reflect mainly net external borrowing from private creditors and short-term flows.

¹ For this table, official holdings of gold are valued at SDR 35 an ounce. This convention results in a significant underestimate of the reserves of those groups of countries that have substantial holdings of gold.

² Excluding Nigeria and South Africa.

³ Ratio of year-end reserves to imports of goods and services during the year indicated.
