IMF INSTITUTE

Report on the Course on Money and Banking Statistics in English

(1987-IX)

June 1 - July 24, 1987

Introduction

The course on Money and Banking Statistics, conducted in English, was presented over an eight-week period. It was organized in cooperation with the Financial Institutions Division of the Bureau of Statistics. The purpose of the course was to review in detail the conceptual and practical issues involved in compiling monetary data for monetary analysis and for monetary policy formulation. The course was based on the Fund's draft of A Guide to Money and Banking Statistics in International Financial Statistics.

Selection of Participants

The Admissions Committee selected 30 participants from the following countries: Australia, Bangladesh, Belgium, Bhutan, Brazil, People's Republic of China, Dominica, Ecuador, Iraq, Israel, Japan, Jordan, Malaysia, Mozambique, Nigeria, Oman, Pakistan, Poland, Portugal, Romania, St. Lucia, Solomon Islands, Sri Lanka, Sudan, Thailand, Turkey, Uganda, the United Kingdom, Viet Nam, and Zimbabwe (see Attachment I).

Organization of the Course

The course was divided into three parts dealing with: (a) the compilation of money and banking statistics; (b) the interrelationships between monetary data and other systems of macroeconomic accounts; and, (c) Fund policies and procedures. In addition to opening and closing sessions, a total of 51 lectures, workshops, and case studies were presented (see Attachment II). Sessions on money and banking statistics and interrelationships with other accounts were conducted by the staff of the Bureau of Statistics, while lectures on the Fund were presented by the staff of the IMF Institute.

The course reviewed the techniques of compiling and presenting monetary data emphasizing the methods best suited to the analysis of monetary policy in country specific situations. These sessions covered issues in the compilation of the monetary accounts for the subsectors of the functionally defined banking sector, consolidation of these subsectors, and the preparation of flow data. The issues discussed were related to actual situations through a series of nine country studies most of which were presented by participants in conjunction with area department representatives.

The sessions on the interrelationships between monetary data and other accounting systems covered the national accounts (SNA), government finance and balance of payments statistics, and intersectoral financing. Particular stress was given to the importance of a consistent statistical framework for analysis and policy formulation. The sessions on Fund activities and policies served to acquaint the participants with the Fund's evolving role in the world economy. Summaries and other documents distributed during the course are listed in Attachment III.

During the course lectures were regularly supplemented by workshops and case studies. In order to facilitate preparation and review of these latter sessions, the participants were divided into five counseling groups. In the last week of the course the participants were afforded the opportunity to comment on the draft of A Guide to Money and Banking Statistics in International Financial Statistics.

Social Activities

A reception was given at the Fund on Thursday, June 4, to welcome the participants and to introduce them to management, members of the Executive Board, and the staff.

Participants were entertained at luncheons hosted by their Executive Directors, by area departments responsible for their countries, and by various staff members of the Fund. In addition, the Institute organized a number of weekend outings, including a visit to New York.

Certificates of attendance were presented to the participants at a farewell luncheon on Friday, July 24.

List of Topics

Course on Money and Banking Statistics in English, 1987-IX

I. Money and Banking Statistics

A. Methodology

1. Analytical Framework
2. Sectorization of the Economy
3. Classification of Financial Instruments
4. Monetary Authorities (2 sessions)
5. Fund Accounts
6. Deposit Money Banks (2 sessions)
7. Other Banking Institutions
8. International Banking Statistics
9. Monetary/Banking Survey
10. Valuation, Flow Data and Factors Tables (2 sessions)
11. Country Studies (5 sessions)

B. Case Studies and Workshops

1. Sectorization: Workshop
2. Fund Accounts: Workshop
3. Monetary Authorities: Case Study (5 sessions)
4. Deposit Money Banks: Case Study (4 sessions)
5. Other Banking Institutions: Case Study (3 sessions)
6. Monetary/Banking Survey: Case Study (3 sessions)
7. Valuation, Flow Data and Factors Tables: Workshop

II. Interrelationships With Other Accounts

1. Government Finance Statistics (lecture and workshop)
2. Balance of Payments Statistics (lecture and workshop)
3. System of National Accounts (SNA)
4. Intersectoral Financing (lecture, 2 sessions, and case study, 4 sessions)

III. Fund's Policies and Procedures

1. Organizational Aspects of the International Monetary Fund
2. Origins and Uses of Fund Resources
3. International Liquidity and Special Drawing Rights
4. The Fund's Code of Conduct
